

# Word

WordQ is designed to help all individuals with pre, peri and post writing support including those with physical disabilities, neurodiversity, or anyone facing barriers to literacy. Being available to all, WordQ is helping to normalise the use of assistive technology in the classroom and workplace.

## Key Features of WordQ

- **Word Prediction:** WordQ can predict the next word a user intends to type in as few as 1.3 keystrokes, offering contextually appropriate suggestions and usage examples.
- **Speech Feedback:** The software can read aloud typed text, allowing users to catch errors and learn pronunciation.
- **Proofreading Mode:** Users can select text to have it read back to them, supporting the editing process.
- **Speech Recognition:** This feature enables users to dictate text using their voice.
- **PDF Editor:** An integrated tool for working with PDF documents.
- **ThoughtQ:** A research and vocabulary development tool that provides topic-related vocabulary to assist with pre-writing tasks.
